GS1006P

6-Port Gigabit PoE+
Switch with 2 Uplink Ports

1.Product Overview

GS1006P is 6-port 10/100/1000Mbps switch with 4 port PoE(Port1~4). The electrical power and data transmission on the same cable can expand your network to the places where no power lines or outlets, where you can install devices such as APs, IP cameras, or IP phones etc.

In the Extend operation mode, the switch operates on a per-port basis at 10Mbps duplex operation but can support 32W PoE power output over a distance of up to 200 meters overcoming the 100m limit on Ethernet UTP cable. With this brand-new feature, the switch provides an additional solution for 802.3at/af PoE distance extension, thus saving the cost of Ethernet cable installation. Support QoS, when the network overload or congestion, the first four ports according to 1: 2: 4: 8 weight configuration to ensure that important business is not delayed or discarded, to ensure the efficient operation of the network.And the switch supports VLAN function which can improve the network environment and reduces network maintenance costs. It is easy to manage and maintain which can meet a lot of networking environment, such as Business building, Community, Hotel, Office etc.
